# 6T-2 SITE DUMPER.

## THE 6T-2 SITE DUMPER IS THE SAFEST AND MOST PRODUCTIVE MACHINE IN ITS CLASS. WITH A SPECIFICALLY DESIGNED JCB DRIVETRAIN, AND 3 DIFFERENT SKIP VARIANTS ON OFFER, YOUR BUSINESS CAN TRUST IN JCB TO GET THE JOB DONE.

### Unrivalled safety.

1 The JCB SiTESAFE cab on the 6T machine provides the operator safety and comfort.

2 An initial movement alarm warns people in the surrounding area of the machine. An optional object detection system alerts the operator to any objects near to the machine, preventing accidents and damage, whilst in operation.

3 The front tip and swivel tip machines come with a front mounted camera as standard to comply with visibility standards. Additionally, there is the option of upgrading to the full side and rear camera kit, further improving visibility and safety.

For even greater operator protection, an optional skip guard prevents large pieces of material falling out of the back of the skip.

4 As an alternative to the standard ROPS frame, a ROPS/FOPS Level II frame is available, providing a greater level of safety for the operator. JCB SiTESAFE cab offers even greater levels of safety.
